

Partnering to make Louisiana a destination for healthcare

LCMC Health and Tulane University have announced their intent to partner to expand access to comprehensive and specialty care across Southeast Louisiana. Pending approval from the Louisiana Department of Justice, their combined structure will enhance the region's capabilities as a destination for medical innovation and training and provide community investments and benefits.

- Approximately **\$600 million commitment to downtown New Orleans**, including new construction and enhancements. This represents a one-time impact of \$1 billion on the Louisiana state economy.
- **\$220 million investment in the community** to provide best-in-class academic medical center and facility improvements.
- **\$286 million estimated annual economic impact** and potential creation of **2,300 jobs** in downtown New Orleans and throughout the state.
- **Life-saving research.** Tulane University attracts more than **\$200 million** in research funding annually, much of it devoted to finding new vaccines and treatments for infectious diseases, Alzheimer's and other neurological disorders, hypertension, cancer, diabetes, and more.
- **Access.** Advancing health equity through more comprehensive care in downtown New Orleans and expanded hubs for specialty care in Orleans and Jefferson Parishes.
- **Education.** Establishing a new nursing program, clinical research programs, and educational spaces for students; graduate programs in public health, social work, professional advancement, and medicine, along with new space dedicated to research.
- **Innovation.** Investing in groundbreaking research, technologies, and lifesaving treatments.
- **Elevated patient care.** Creating more opportunities for comprehensive, integrated care at facilities that can support new growth and enhanced patient experiences.

“LCMC Health and Tulane University have shared values and a vision to partner to bring the best of community healthcare and academic medicine to all those we serve. With this transformational partnership, we can build on our strong history of collaboration with our academic partners, Tulane University and Louisiana State University, to do more for our patients, communities, and region together than would be possible as separate organizations.”

Greg Feirn
Chief Executive Officer,
LCMC Health

“Academic medical centers provide the most complex and high-quality care and are the birthplace of new treatments and technologies. Joining with LCMC Health will help drive clinical, educational, and economic innovation and growth that improves the quality of life across our entire region.”
