

One of a kind care comes from one of a kind people

Academic Affairs Resident Spotlight

Cameron Holmes, MD

Specialty

Obstetrics & Gynecology

Program affiliation

LSU Health Sciences Center

Why did you become a healthcare provider?

Initially, I was inspired by the pediatric cardiologist who cared for me during my childhood after being born at 28 weeks with a VSD. During medical school, I developed a fascination with Ob/Gyn after witnessing my first delivery and getting to experience first hand the miracle of life. In reevaluating my inspiration for pursuing medicine, I realized that I had not thought to consider the physician who took care of me while in utero. Moreover, he cared for my mom during one of the hardest times in her life. I was raised and surrounded by very strong women, I married a really strong woman, and I have an enormous amount of respect for the things that make women special. I value the opportunity to be involved in meaningful parts of women's lives - their sexual and reproductive health, walking with them through pregnancy, and providing primary gynecologic care. The female body represents her womanhood and I am honored to be allowed to care for her over her lifetime.

Why can patients count on you to provide extraordinary care?

"Wherever I go, whoever I meet. Remember to be kind and gentle, thoughtful and gracious. For I do not know the burdens others may bear, in their hearts, in their minds, or in their bodies." This is how I try to approach every patient. I strive to listen first before speaking. I try to treat every patient as if I were treating my wife, mom, sister, grandmother, friend, or other family member. Everyone has a story and it's my job to meet my patients in whatever chapter they find themselves in.

What's your little something extra?

I have been singing and playing piano my whole life. I worked as a worship leader at a church in Houston for a couple years before going to medical school. I also have a love for aviation and hope to get my pilot's license one day.
