- ❖ training information follows on next slide

# Wheelchair Training

There are different wheelchairs used for patients and guests at the hospital.

- **Regular patient wheelchairs**

- Ensure the wheelchair brakes are locked on both wheels before a patient/guest enters or exits the wheelchair.
- Ensure both footrests are in the UP position upon entry or exit.
- Lower footrests after patient/guest is seated.
- Always use both hands while transporting.
- Always back the wheelchair into an elevator so the guest is facing the front.
- Volunteers NEVER physically lift a patient/guest into or out of a wheelchair. Patient/guests should be able to rise easily out of the chair.
- For any individual who you feel you are unable to safely transport by wheelchair, should be transported by a qualified staff member to avoid injury to the patient/guest and/or volunteer.
- For assistance, call the Volunteer Office at 503-5548.
- If a wheelchair is not functioning properly or missing parts (footrests, etc.), remove it from service and bring to the Volunteer Office.

  - Release the handle brake ONLY after you stop moving or the patient will jolt forward.
  - There are blue, red, green and black Staxi Wheelchairs throughout the hospital.
  - The arms of these chairs may be lifted for better entry/exit into the chair.
  - Small footrests should always be lifted and placed back down when a patient/guest enters or exits the chair.
  - For any questions on these types of wheelchairs, please call the Volunteer Office at 503-5548.

Volunteers NEVER bring a patient/guest into any of the garages to go up or down the ramps. You may bring the patient/guest to the doorway inside the garage but they must walk to their vehicle the rest of the way. For further clarification, please call the Volunteer Office at 503-5548.
